

Maria Nugent, National Museum of Australia

Captain Cook was here

**Drama... Intrigue... 8 days in 8 chapters...**

AU\$ 39.95 | NZ\$ 49.95

Captain Cook Was Here is a dramatic and lively account of the encounters between Captain Cook, his crew and the indigenous people of Australia during the Endeavour's first landing at Botany Bay, on Australia's east coast in 1770. These encounters were marked by drama, intrigue, fear and confusion. Maria Nugent depicts with sensitivity and precision an iconic episode in Australian history, giving full attention to Cook and his men's interactions with, and interest in, the local people.

- An original examination of Aboriginal storytelling and little known nineteenth-century narratives about Captain Cook.

- Strips away misunderstandings and falsehoods that have accumulated about a foundational event in Australian history.

- Maria Nugent is a winner of the inaugural *Allan Martin Award* presented for innovative research in Australian history.

- Brings together surviving objects and artefacts, as well as much of the artwork produced then.

While other books only deal with Captain Cook in his own specific time, Nugent extends the scope of the narrative to consider the many stories told about him by Aboriginal and non-Aboriginal people from the nineteenth-century to present.

Australian Author

An Introduction to Australian Public Policy

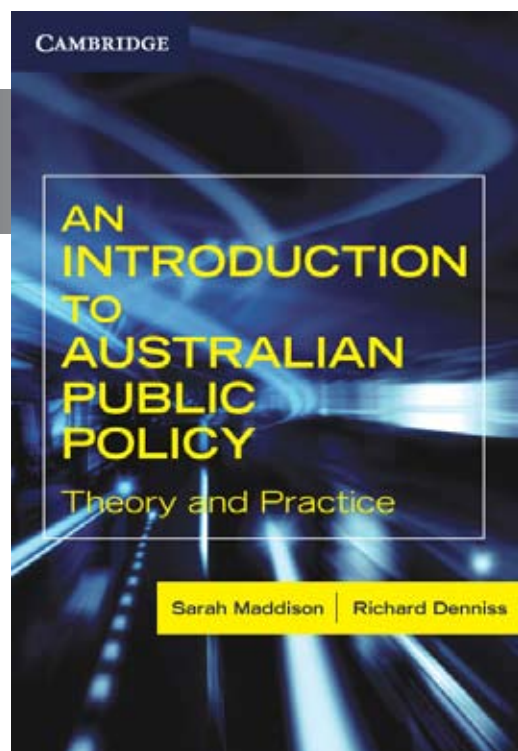

Theory and Practice

The first part covers theoretical elements of policy making, looking at the Australian policy context, while the second half focuses on the practical elements of policy making

by Sarah Maddison (*University of New South Wales*) and Richard Denniss

Australian Politics. The first book to comprehensively address both the theoretical and practical aspects of policy making in Australia. Written in an accessible style, this text is designed to introduce students to the real world challenges and skills involved in working in a range of policy roles. Drawing on their own experiences, the authors ground public policy theory in a number of key controversies to illustrate the contestable nature of the policy process. Each chapter features case studies that outline contemporary policy issues, such as the deregulation of the financial system, "Knowledge Nation", paid maternity leave, and the Northern Territory intervention. Including practical exercises on how to write policy briefs and media releases, this book is essential reading for anyone who needs to know how public policy is developed in Australia.

Dinosaurs

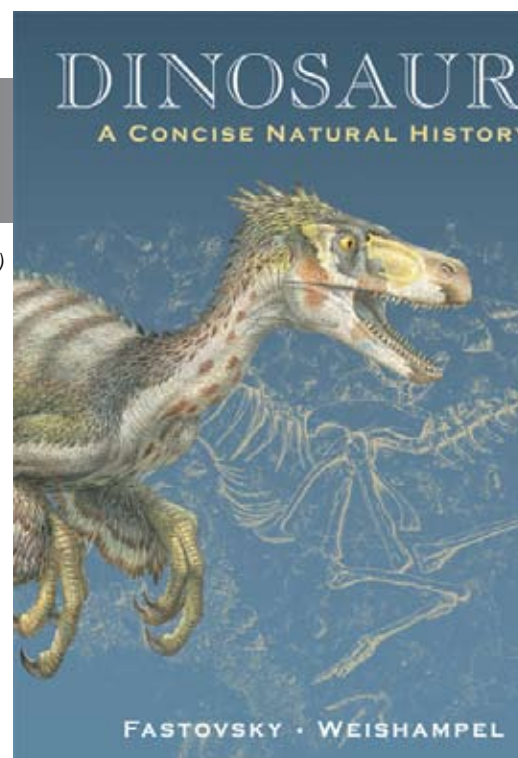

A Concise Natural History

The dinosaurs are brought to life in commissioned drawings from the acclaimed dinosaur illustrator, John Sibbick

by David Fastovsky (*University of Rhode Island*) & David Weishampel (*Johns Hopkins University*)

Natural History. From the authors of *The Evolution and Extinction of the Dinosaurs*, comes a general introduction to the study of dinosaurs for non-specialists, designed to excite readers about science by using the ever-popular animals - the dinosaurs - to illustrate and discuss geology, natural history and evolution. While it focuses on dinosaurs, it also uses them to convey other aspects of the natural sciences, including fundamental concepts in evolutionary biology, physiology, life history, and systematics. Considerable attention is devoted to the nature of science itself: what it is, what it is not, and how science can be used to investigate particular kinds of questions. *Dinosaurs* is unique because it fills a gap between the glossy, fact-driven dinosaur books for younger readers, and the higher-level academic books, addressing the palaeontology of dinosaurs exactly as professionals in the field do.

Follies of Power

America's Unipolar Fantasy

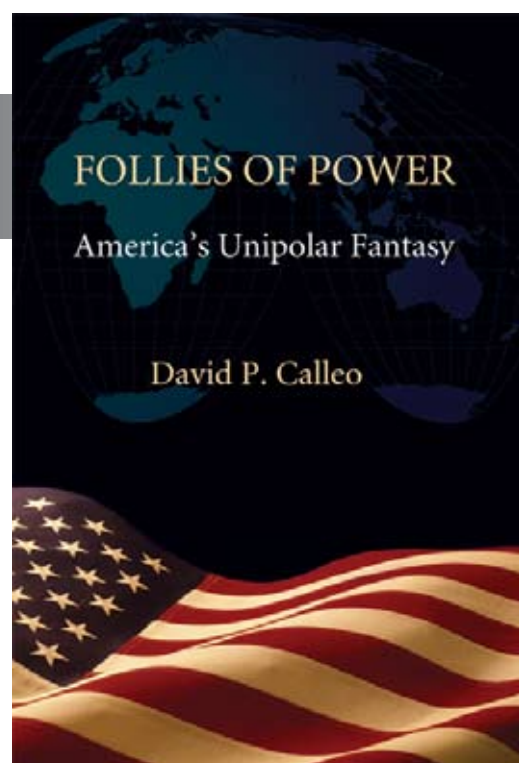

Brings together a rich interdisciplinary analysis of American strengths and weaknesses in a rapidly evolving world

by David P. Calleo, *Johns Hopkins University*

Politics. The imagination of America's political elites is dominated by a unipolar vision, according to which the world is dominated by the United States. But the real world is increasingly plural, and others instinctively fear and resist the American vision. This book looks at the disastrous consequences of this vision at work in the Middle East and Europe and assesses the limits of American power.

Calleo discusses the problems of order and coexistence in a world that is not unipolar but increasingly plural, speculating on the possible contributions and likely fate of both "Old America" and "New Europe" as models for organizing the future. America's own constitutional equilibrium, he argues, increasingly requires friendly balancing from Europe as both sides of the West must liberate their imaginations from past triumphs to face their responsibilities to the new world and to each other.

Douglas Haig and the First World War

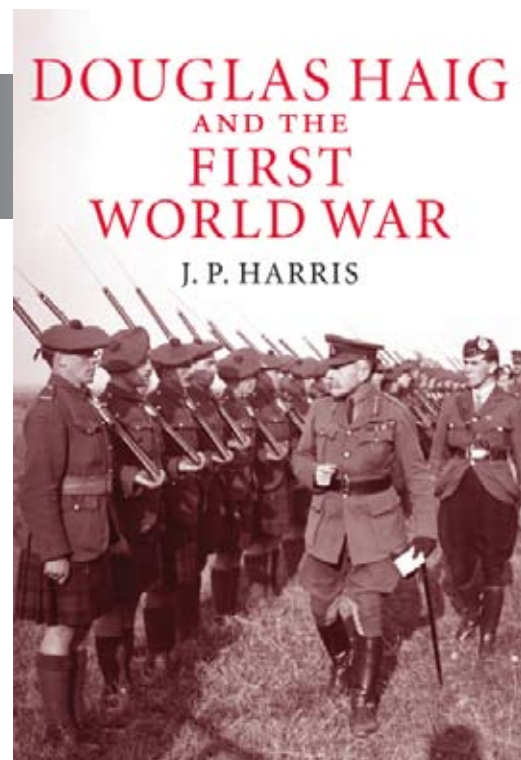

A new biography of Sir Douglas Haig, one of the most controversial commanders in British military history.

by J. P. Harris

British history. From December 1915 until the armistice of November 1918, Sir Douglas Haig was commander-in-chief of the largest army his country had ever put into the field. He has been portrayed as both an incompetent "butcher and bungler" and a clear-sighted, imperturbable "architect of victory".

A dedicated military professional, Haig nevertheless found it difficult to adjust to the unprecedented conditions of the Western Front. His capacity to read battles and broader strategic situations often proved poor and he bears much responsibility for British losses that were excessive in relation to the results achieved. By late 1917 his own faith in ultimate victory had become so badly shaken that he advocated a compromise peace. However, after surviving the German spring offensives of 1918, he played a vital role in the campaign that finally broke the German army.

A History of Modern Burma

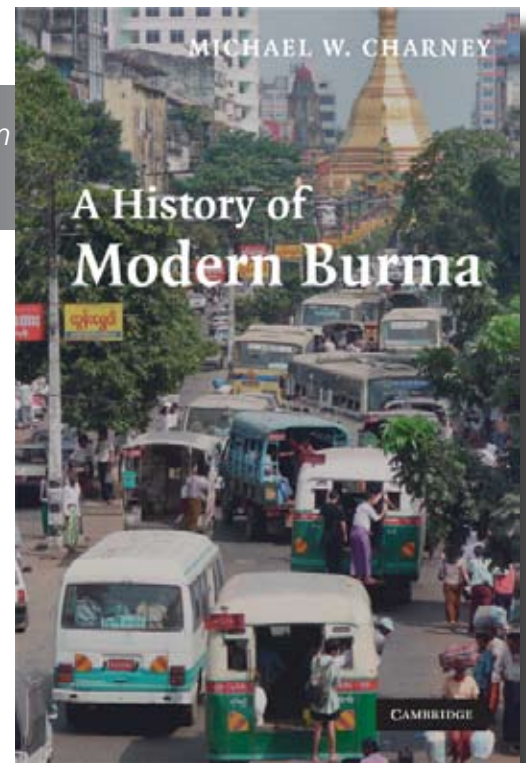

The first general history of modern Burma in over five decades, from its pre-colonial past to the Saffron Revolution of 2007

by Michael W. Charney, *University of London*

History. Burma has lived under military rule for nearly half a century. The results of its 1990 elections were never recognized by the ruling junta and Aung San Suu Kyi, leader of Burma's pro-democracy movement, was denied her victory, living under house-arrest ever since. Now an economic satellite and political dependent of the People's Republic of China, Burma is at a crossroads. Will it become another North Korea, will it succumb to China's political embrace or will the people prevail?

Michael Charney's book - the first general history of modern Burma in over five decades - traces the highs and lows of Burma's history from its colonial past to the devastation of Cyclone Nargis in 2008. By exploring key themes such as the political division between lowland and highland Burma and monastic opposition to state control, the author explains the forces that have made the country what it is today.

A History of Bangladesh

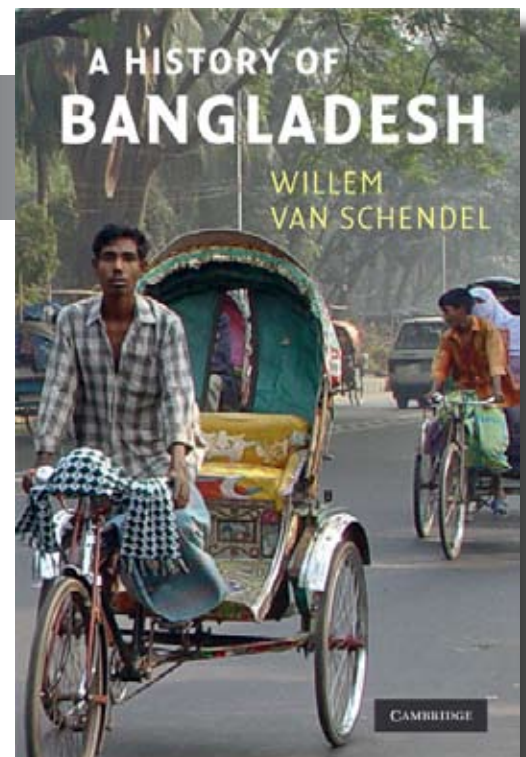

Includes a chronology, biographies of key political figures, a glossary, maps and over 110 images that bring Bangladesh to life

by Willem van Schendel, *Universiteit van Amsterdam*

History. Bangladesh is a new name for an old land whose history is little known to the wider world. A country chiefly famous in the West for media images of poverty, underdevelopment, and natural disasters, Bangladesh did not exist as an independent state until 1971. Willem van Schendel's history reveals the country's vibrant, colourful past and its diverse culture as it navigates the extraordinary twists and turns that have created modern Bangladesh.

The story begins with the early geological history of the delta which has decisively shaped Bangladesh society then moves chronologically through the era of colonial rule, the partition of Bengal, the war with Pakistan and the birth of Bangladesh as an independent state. This is an eloquent introduction to a fascinating country and its resilient and inventive people.

Cartesian Linguistics, 3rd Edition

A Chapter in the History of Rationalist Thought

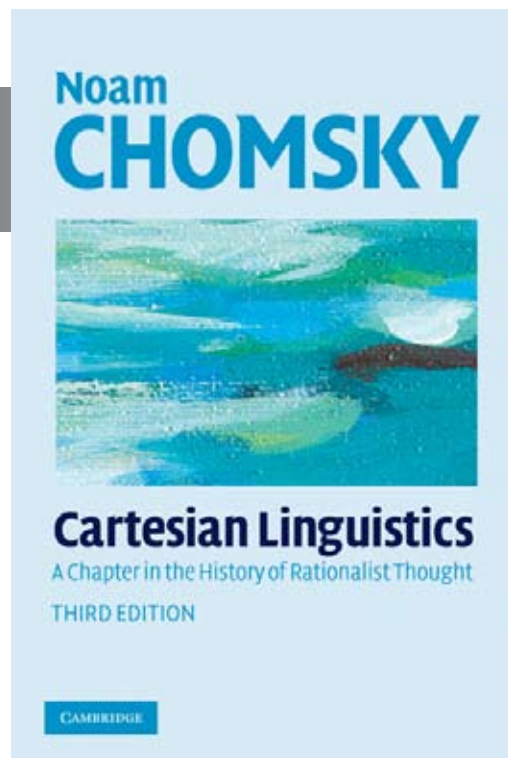

The foreign-language passages have been translated and the relationship between the original edition and contemporary biolinguistic work is explained

by Noam Chomsky, *Massachusetts Institute of Technology*

Language and Linguistics. In this extraordinarily original and profound work, Noam Chomsky discusses themes in the study of language and mind since the end of the sixteenth century in order to explain the motivations and methods that underlie his work in linguistics, the science of mind, and even politics. This edition includes a new and specially written introduction by James McGilvray, contextualising the work for the twenty-first century.

It has been made more accessible to a larger audience as all the French and German in the original edition has been translated, and the notes and bibliography have been brought up to date. This challenging volume is an important contribution to the study of language and mind, and to the history of these studies since the end of the sixteenth century.

Kierkegaard

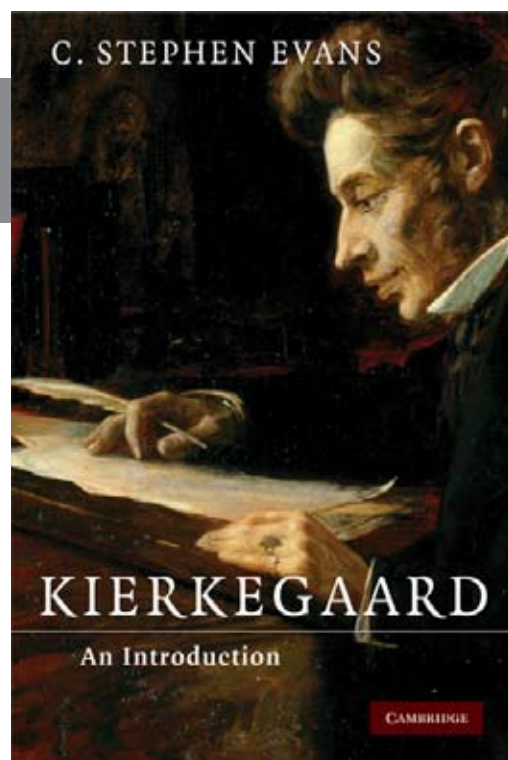

An Introduction

Brings Kierkegaard into conversation with western philosophers past and present

by C. Stephen Evans, *Baylor University, Texas*

Philosophy. A clear, readable introduction to Kierkegaard as a philosopher and thinker, organised around Kierkegaard's concept of the three stages or "spheres" of human existence, which provide both a developmental account of the human self and an understanding of three rival views of human life and its meaning. Evans also discusses such important Kierkegaardian concepts as "indirect communication", "truth as subjectivity", and the Incarnation understood as "the Absolute Paradox". Although his discussion emphasises the importance of Christianity for understanding Kierkegaard, it shows him to be a writer of great interest to a secular as well as a religious audience and brings him into conversation with western philosophers past and present.

Political Thought and History

Essays on Theory and Method

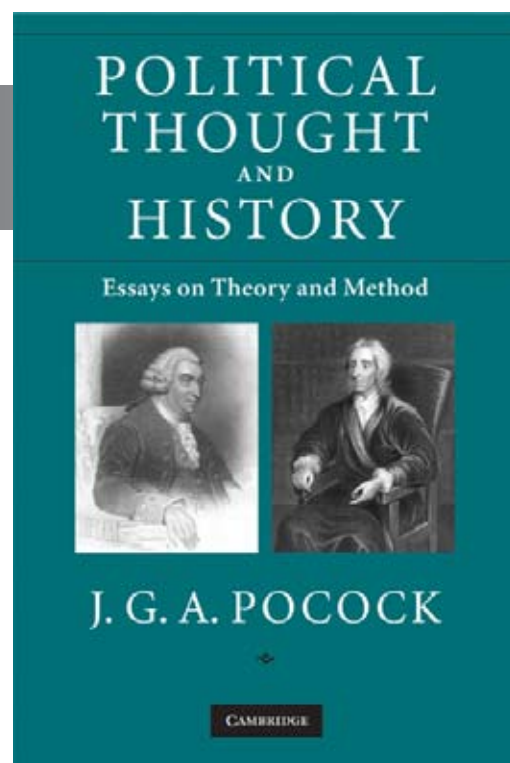

A compilation of the major methodological statements in political thought over the last 40 years by a world famous author

by J.G.A. Pocock, *Johns Hopkins University*

Politics & Social Theory. John Pocock is arguably the most original and imaginative historian of ideas of modern times. Over the past half century he has created an audience for his work which is truly global, and he has marked the way in which the history of political thought is studied as deeply and personally as any historian of the period. The essays in this major new collection are selected from a lifetime of thinking about political thought, and how we should study it in history.

What in fact does it mean to write the history of a political society, and what kind of political thought is this? Professor Pocock emphasises both the theory and practice of political thought considered as action in history, and the political theory of historiography considered as a form of political thought. Together these essays constitute a collection that any serious student of politics and intellectual history needs to possess.

Heroes and Martyrs of Palestine

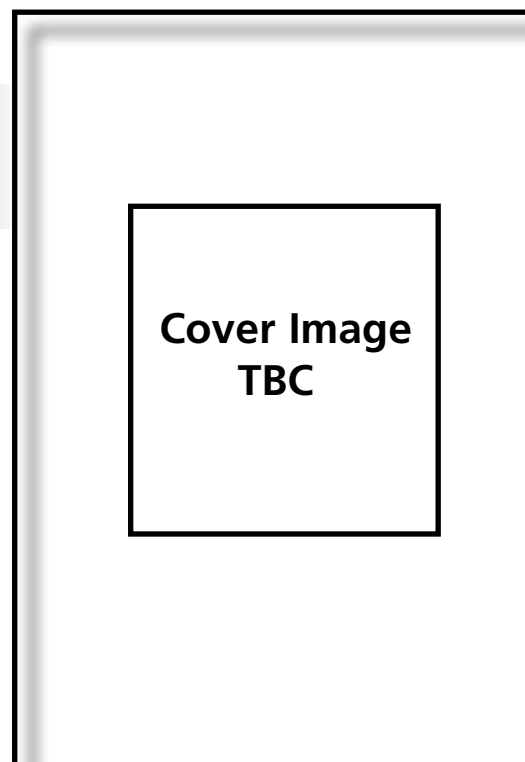

The Politics of National Commemoration

by Laleh Khalili, *University of London*

Politics & Social Theory. The history of the Palestinians since the middle of the twentieth century has been one of turmoil, a people living under occupation or exiled from their homeland. Theirs has been at times a tragic story, but also one of resistance, heroism and nationalist aspiration.

Laleh Khalili's book is based on her experiences in the Lebanese refugee camps, where commemorations of key moments in the history of the struggle have helped forge a sense of nationhood. She also observes how, as discourses of liberation have evolved in recent years within the international community, there has been a shift in the representation of Palestinian nationalism from the heroic to the tragic mode. This trend is exemplified through the elevation of martyrs to iconic figures in the Palestinian collective memory.

Triumph Forsaken

The Vietnam War, 1954-1965

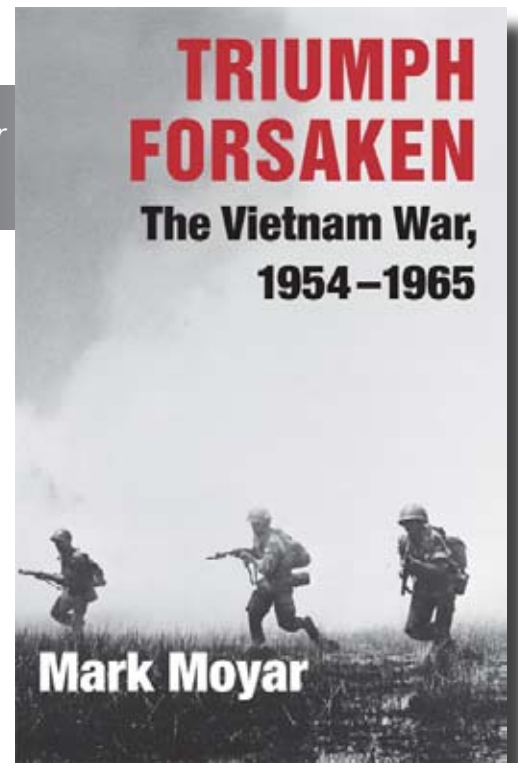

Overturns most of the dominant interpretations of the Vietnam War and shows that the United States could have won it

by Mark Moyar, Marine Corps University

American History. Drawing on a wealth of new evidence from all sides, *Triumph Forsaken* overturns most of the historical orthodoxy on the Vietnam War. Through the analysis of international perceptions and power, it shows that South Vietnam was a vital interest of the United States. The book provides many new insights into the overthrow of Ngo Dinh Diem in 1963 and demonstrates that the coup negated the South Vietnamese government's tremendous, and hitherto unappreciated, military and political gains between 1954 and 1963.

After Diem's assassination, President Lyndon Johnson had at his disposal several aggressive policy options that could have enabled South Vietnam to continue the war without a massive US troop infusion, but he ruled out these options because of faulty assumptions and inadequate intelligence, making such an infusion the only means of saving the country.

European Identity

An all-star team of authors explore the politics of European identity from a range of perspectives

Edited by Jeffrey T. Checkel and Peter J. Katzenstein

Politics & Social Theory. Why are hopes fading for a single European identity? Economic integration has advanced faster and further than predicted, yet the European sense of 'who we are' is fragmenting. Exploiting decades of permissive consensus, Europe's elites designed and completed the single market, the euro, the Schengen passport-free zone, and, most recently, crafted an extraordinarily successful policy of enlargement. At the same time, these attempts to de-politicize politics, to create Europe by stealth, have produced a political backlash. This ambitious survey of identity in Europe captures the experiences of the winners and losers, optimists and pessimists, movers and stayers in a Europe where spatial and cultural borders are becoming ever more permeable.

An Introduction to Music Studies

The editors are from the RHUL Music Department, ranked as the No. 1 Music department in the UK

Edited by J. Harper-Scott & Jim Samson, *Royal Holloway, University of London*

Music. Why study music? How much practical use is it in the modern world? This introduction proves how studying music is of great value both in its own terms and also in the post-university careers marketplace. The book explains the basic concepts and issues involved in the academic study of music, draws attention to vital connections across the field and encourages critical thinking over a broad range of music-related issues. The book covers all main aspects of music studies, including topics such as composition, opera, popular music, and music theory. It provides a thorough overview of a hugely diverse subject, from the history of early music to careers in music technology, giving a head-start on the areas to be covered on a music degree. Glossaries give clear definitions of key musical terms and chapters are carefully structured to enable easy and quick location of the information needed.

How to Think Like a Mathematician A Companion to Undergraduate Mathematics

Essential for any starting undergraduates in mathematics and also of benefit to engineers and physicists

by Kevin Houston, *University of Leeds*

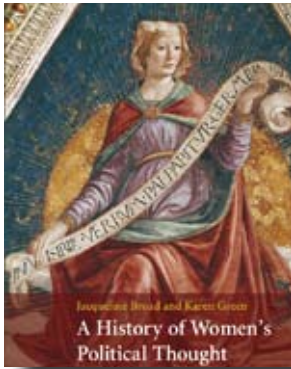

Mathematics. Looking for a head start in your undergraduate degree in mathematics? Maybe you have already started your degree and feel bewildered by the subject you previously loved? Don't panic! This friendly companion eases beginning students into real mathematical thinking, unlocking important techniques for effective mathematics so you can communicate with clarity, solve problems, and explore the world of definitions, theorems and proofs with real confidence. Concrete examples are used throughout, with plenty of practice on topics common to many courses such as divisors, Euclidean algorithms, modular arithmetic, equivalence relations, and injectivity and surjectivity of functions. The material has been tested by real students over many years so all the essentials are covered.

A History of Women's Political Thought in Europe, 1400-1700

by Jacqueline Broad (*Monash University*) & Karen Green (*Monash University*)

A survey of the history of women's political thought in Europe from the late medieval period to the early modern era. The book examines women's ideas about topics such as the basis of political authority, the best form of political organisation, justifications of obedience and resistance, and concepts of liberty, toleration, sociability, equality, and self-preservation.

Atlas of Historical Eclipse Maps

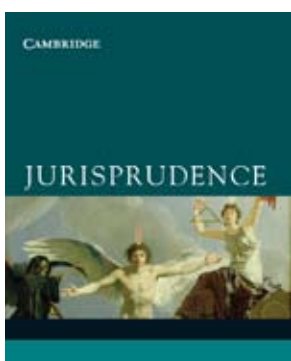

East Asia 1500 BC-AD 1900

by M A Houlden & F. R. Stephenson

Astronomy. This book presents a series of computer-drawn maps for all total and annular eclipses of the Sun calculated to have been observable in East Asia from 1500 BC to AD 1900. The study of past eclipses is useful, for example in determining the long-term behaviour of the Earth's rate of rotation.
