A lively and systematic account of Australia's history, incorporating the works of more than sixty leading historians

The Cambridge History of Australia offers a comprehensive view of Australian history from its pre-European origins to the present day. Over two volumes, this major work of reference tells the nation's social, political and cultural story. Volume 1 examines Australia's indigenous and colonial history through to the Federation of the colonies in 1901. Volume 2 opens with the birth of the twentieth century, tracing developments in the nation through to the present day.

Each volume is divided into two parts. The first part offers a chronological treatment of the period, while the second examines the period in light of key themes, such as law, religion, the economy and the environment. Both volumes feature detailed maps, chronologies and lists of further reading.

This is the first general history of Australia for several decades, featuring contributions from over 60 historians who are all leading experts in their fields. This is the ideal reference for students, scholars and general readers.

Dean's Research Awards 2015

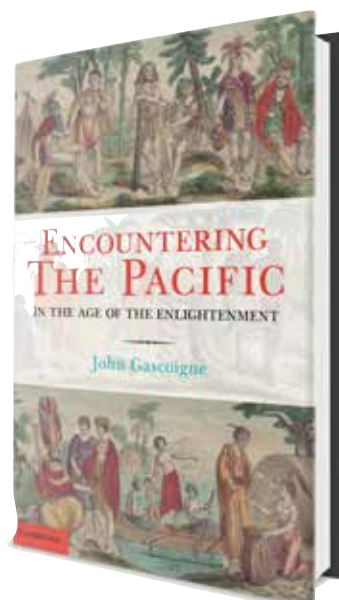

Cambridge University Press are pleased to announce that Scientia Professor John Gascoigne has won Best Monograph for his book ***Encountering the Pacific in the Age of the Enlightenment*** at the Dean's Research Awards 2015. You can read more about it here:

The Dean's Research Awards recognise and reward excellent research performance by UNSW Arts & Social Sciences' academics.

This year's award ceremony was held on Wednesday 21 May at Walsh Bay to coincide with the Sydney Writers' Festival, of which UNSW Arts & Social Sciences is a major partner.

Ian Jacobs, UNSW President and Vice-Chancellor, was in attendance to present the awards to this year's successful winners.

"Epic in scale, rich in data, and magisterial in the telling, John Gascoigne's book represents nothing less than a re-imagining of the push-pull of cultural and political forces in the Pacific. Structured around the themes of exploration and encounter, wealth, belief and knowledge, he shows how European Enlightenment ideals run up against the complex reality of Pacific cultures and societies."
