**AU\$ 39.95 NZ\$ 49.95**

Henry Reynolds

**Australian Author**

**History.** This captivating work charts the history of Tasmania from the arrival of European maritime expeditions in the late eighteenth century, through to the modern day. By presenting the perspectives of both Indigenous Tasmanians and British settlers, author Henry Reynolds provides an original and engaging exploration of these first fraught encounters.

Utilising key themes to bind his narrative, Reynolds explores how geography created a unique economic and migratory history for Tasmania, quite separate to the mainland experience. He offers an astute analysis of the island's economic and demographic reality, by noting that this facilitated the survival of a rich heritage of colonial architecture unique in Australia, and allowed the resident population to foster a powerful web of kinship.

Reynolds' remarkable capacity to empathise with the characters of his chronicle makes this a powerful, engaging and moving account of Tasmania's unique position within Australian history.

New Zealand Author

*A beautifully narrated story of this rugged and dynamic land, from its origins some 80 million years ago to the twenty-first century*

by Philippa Mein Smith, University of Canterbury, Christchurch, New Zealand

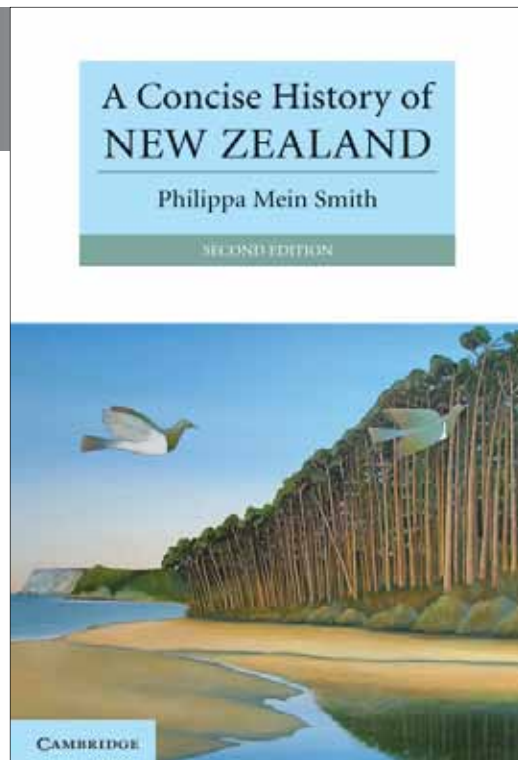

**History.** The story of this rugged and dynamic land is beautifully narrated, from its origins in Gondwana some 80 million years ago to the twenty-first century. Philippa Mein Smith highlights the effects of the country's smallness and isolation, from its late settlement by Polynesian voyagers and colonisation by Europeans – to the dramatic struggles over land and recent efforts to manage global forces. *A Concise History of New Zealand* unravels key moments, showing their role as nation-building myths and connecting them with the less dramatic forces, economic and social, that have shaped contemporary New Zealand.

# The Origins of AIDS

*An essential new perspective on HIV/AIDS and on the lessons that must be learnt if we are to avoid another pandemic in the future*

by Jacques Pepin, Université de Sherbrooke, Canada

**Social science.** It is now thirty years since the discovery of AIDS but its origins continue to puzzle doctors and scientists. Jacques Pepin looks back to the early twentieth-century events in Africa that triggered the emergence of HIV/AIDS and traces its subsequent development into the most dramatic and destructive epidemic of modern times. This is an essential new perspective on HIV/AIDS and on the lessons that must be learnt if we are to avoid provoking another pandemic in the future.

- Comprehensive and coherent history of events that led to the global HIV/AIDS pandemic, which will appeal to those with direct or personal links with the disease itself or the study of it
- Adds historical perspective to recent molecular work on the chronology of the development of the virus
- Emphasises how colonialism and the urbanisation of central Africa, as well as interventions to control tropical diseases, created the right environment for HIV/AIDS to develop

*The first book in English on one of the largest battles of World War II*

- Opens up a critical new dimension in Hitler and Stalin's struggle for supremacy on the Eastern front
